Our Mission

To offer plant-based alternatives to disposable plastic products,

Act as a zero-waste solution

To pave the way to an energy and carbon-neutral future.

To remain in line with the "Circular Bioeconomy".

Our product concept

100% Vegan

Multi grains (Contains wheat and gluten)

Nut-free

Our products are more than you think

For cold or hot drinks up to 85°C

No drink is too hot or too cold! Edible cutlery will never burn your fingers.

Crunchy for 40 minutes

Edible cutlery will be crunchy till the end.

Lightweight 14 or 26 grams

Light as a cookie yet tasty as a snack.

Low calories 56 to 105 kcal

Edible cutlery are a perfect guilt-free snack with your meal or a beverage.

Our products

Edible Cutlery combines cookie with cutlery

Edible Cutlery is made from a novel and sophisticated recipe consisting of plant-based and multi-grain ingredients, which are processed and baked with much love by Edible Cutlery. A new patented production process helps us to achieve the perfect balance between functionality, stability, and excellent taste.

Our advantages at a glance:

- ★ No recycling required - 100% edible after use
- ★ Compostable in < 30 days
- ★ Taste unfolds only after use
- ★ Made from plant-based materials
- ★ No waste, no handling, no rinsing = zero-waste
- ★ Best environmental performance of all SUP-alternatives
- ★ Sustainable production in line with the Circular Bioeconomy

For indoors and outdoors

Edible Cutlery is equally ideal for indoor and outdoor usage, for any weather conditions, for personal or corporate catering:

Category	Type Temperature	Stability
Hot liquid food	Coffee, Tea, Soup up to 100°C	15-30 min
Hot solid food	Pasta, Rice up to 100°C	40-50 min
Cold food	Salads, Overnight oats, Cakes 0°C to 15°C	50-60 min
Frozen food	Ice cream, Milkshakes -25°C to 0°C	50-60 min

Our contribution to climate protection

Edible Cutlery, the eco-friendly plastic alternative

More than 368 million tons of plastic waste are being produced globally every year. The plastic waste management system accounted for 18% of plastic recycling, 24% were incinerated, while the remaining 58% ended up as landfills in natural environment. Several regions and market players from Australia, Europe, Canada, USA, India and UK have amended new laws to phase out Single-use Plastics products like cutlery to cater to the rising demand for change. WA being one of the first states in the world to progressively phase out single use plastics.

Climate protection is close to our hearts. The life cycle assessment table shows, that Edible Cutlery is the most sustainable alternative:

Production (per 1,000kg material)	Energy Consumption	Water Consumption	CO² Emissions
Polypropylene (PP)	20.760 kWh	43.079 l	1.680 kg
Polystyrene (PS)	25.070 kWh	172.780 l	2.530 kg
Wood	9.520 kWh	15.300 l	2.000 kg
Bio-Plastic (PLA)	11.930 kWh	69.730 l	6.380 kg
Edible Cutlery	4.600 kWh	12.000 l	1.270 kg

- ★ Edible Cutlery consistently outperforms alternative materials in terms of CO², water, and energy consumption.
- ★ PLA or "Bio-Plastic" has a 2 to 6 times worse environmental footprint in comparison to other alternatives.
- ★ The commonly perceived wood, as an eco-friendly material in reality, has adverse effects on the environment, especially in the categories of energy and CO² consumption.

Edible spoon - savoury

140x35x4mm | edible | tasty

Perfect fit for soups, risotto, rice, curry, take-away boxes and more.

This is a 3D shaped spoon available as pleasantly savoury. With flavours coming up in mint, masala and more. Its delicious taste unfolds when customers read "EAT" and bite into it after usage. A perfect balance of stability and edibility. The minimum shelf life is 12 months.
